Infocare CRM – application architecture

1 · LEAD CHANNELS

Direct marketing

Field app visit log, events, walk-ins

Email

Shared sales inbox (Gmail / Outlook)

Social media

Meta Lead Ads, Instagram & Facebook DMs, LinkedIn

WhatsApp

WhatsApp Business API

Website

Enquiry and quote-request forms

↓ webhooks · email polling · APIs — every lead stamped with source + campaign

2 · AUTOMATION & AI

n8n (self-hosted)

Capture & de-duplicate · route by branch and product · assign owner · reminders & escalations · daily 8:45 briefing · twice-weekly pipeline report · sync with accounting

Claude API

Classify & summarise enquiries · draft replies and follow-ups · draft BOQ from survey notes · write briefings · voice-note to text

↓ reads and writes through the API only — AI never edits the database directly

3 · CORE PLATFORM

Supabase

PostgreSQL

Leads, contacts, companies, deals, products, price list, quotations, activities, tasks

Auth & roles

Row-level security: Dubai, RAK and Kerala see their own data; managers see all

File storage

Site photos, drawings, data sheets, quotation PDFs

Edge Functions + SQL functions

Stage rules, price & VAT, numbering, quotation PDF, calls to Claude

↑ supabase_flutter SDK · live updates · offline copy on the phone, synced when back online

4 · APPS

One Flutter codebase

Desktop & web build

Windows app or browser: sales, management, Kerala back office

Android & iOS app

Field sales: visits, photos, voice notes, GPS, push alerts, offline

Dashboards & reports

Leads by source, pipeline, conversion, revenue by branch / salesperson

↑

5 · OUTSIDE SYSTEMS

Accounting (separate)

Won quote → customer + invoice; payment status syncs back

Outbound messages

Email and WhatsApp, sent only after approval

Backups & monitoring

Daily database backup, off-site copy, uptime alerts

Rule 1 — Prices, totals and VAT come from the database, never from AI.

Rule 2 — Anything a customer sees needs a person's approval.

Rule 3 — Every lead keeps its source and campaign from day one.
